

Typical press connection using Dry Contact Pick Up TS-309-1

TS-309-B, E.C. Pick up adaptor "AKA Pigtail"
Gets wired to an open / close connection

The "Dry Contact" Connection would be wired to a new or existing Micro Switch or any connection such as a relay with a open / close per sheet count no voltage connection.

NOTE: This is a "Dry" no voltage connection. Verify all connection prior to install. Failure to do so may result in damage to the Shooter-IIB and or your presses electronics.
