

QCS Counting Scale

The QCS line is the most popular and versatile counting scales. Available in weight capacities from 3 to 65 pounds, it is perfect for counting both small and large products. The accumulation memory feature maintains a running subtotal up to 1 million pieces. The unit is powered by AC current, or it's own, long-lasting rechargeable battery - perfect for easy portability.

The QCS can be used for weighing, check-weighing, batching, kitting, as well as postal weight verifications. Also a perfect solution for coin, ticket, token, pull-tab, and coupon counting.

Printers will especially appreciate the time savings and efficiencies of the QCS counting scale. It will provide quick count totals of business card, labels, envelopes, etc.

Features:

- *Accumulation Memory Feature maintains a running subtotal of the total count up to 999,999.
- *Tare Feature lets you count items in a box, tray, bucket, or carton.
- *Available in several different weight capacities depending on your particular counting needs.
- *AC or battery operation (included) for complete mobility.
- *Quick and easy recalibration.
- *Perfect for labels, envelopes, business cards, tickets, etc.
- *Optional laminate platter enlarges the work surface to 11.5 x 18"
- *Can count folded, bound, and die cut pieces as well.
- *Counts coins, tokens, tickets, or pull tabs.
- *Compact design and internal battery operation is perfect for route collections.
